

SUJIT KUMAR JHA

Mumbai, Maharashtra | 9702557649 | sujitkumarrjha@gmail.com | github.com/Sujit-Jha

Summary

Full Stack Web Developer with a BSc in Information Technology and experience in web development. Focused on building functional web applications, with knowledge in both front-end and back-end technologies. Continuously improving skills in the field.

Technical Skills

Languages: JavaScript, Python, SQL | **Frameworks:** React, Express.js | **Web Technologies:** HTML, CSS, STRAPI | **Databases:** MongoDB, MySQL | **Tools:** Git, Postman

Projects

Unis-Social-Media

Technologies: React.js, Node.js, Express.js, MySQL, JWT

- Designed and developed a full-stack social media application.
 - Built an interactive React-based front-end for dynamic user interactions, including posting, commenting, and liking.
 - Created user-friendly interfaces for profile creation, editing, and viewing.
 - Implemented secure JWT-based authentication for user login and session management.
 - Developed and optimized RESTful APIs to handle CRUD operations for users, posts, and comments.
 - Integrated MySQL to manage data efficiently, ensuring fast and reliable performance.
-

Image Gallery Project

Technologies: React.js, Node.js, Express.js, Unsplash API

- Developed a responsive image gallery front-end using React, featuring intuitive navigation and a visually appealing layout.
 - Integrated the Unsplash API to enable real-time image search functionality with dynamic grid displays.
 - Designed a smooth user experience, ensuring accessibility across devices and screen sizes.
 - Deployed both the frontend and backend applications, providing a [live demo](#) for users to explore the gallery.
-

E-commerce Web Application

- Built a responsive e-commerce web application using **React.js** for the front-end and **Strapi** as the headless CMS for back-end content management.
 - Integrated **React Router DOM v6.4** for seamless client-side routing and navigation between pages such as product listings, single product details, and shopping cart.
 - Designed a **custom slider component** without using external libraries and implemented a **CSS Flexbox-based grid system** for consistent and adaptive layouts.
 - Created visually appealing and functional components for the navbar, footer, featured products, and product cards to enhance user engagement.
 - Implemented a **shopping cart system** using **React Redux Toolkit**, including state persistence for user convenience.
 - Leveraged **Strapi REST API** to fetch product data with filtering capabilities and display individual product details dynamically.
 - Integrated **Stripe Payment Gateway** for secure and efficient transaction handling directly from the application.
-

Education

BSc in Information Technology

SIES College of Commerce and Economics

August 2021 - April 2024 | Grade: A

Certifications

- Backend Development Course | PHYSICS WALLAH | [Certificate Link](#)
- Freecodecamp | RESPONSIVE WEB DESIGN | [Certificate Link](#)
